<p>Replacement Products* (Corewell Health West and South)</p> <p>Alinity m Collection Kit ITM-1190747</p> <p>And/Or</p> <p>ThinPrep Pap Container <i>Not available via Workday</i> Order via Lab Supply Form</p>	 <p>*Only for patients 14 years and older. 13 and younger please use APTIMA</p>

Beginning August 26, 2024, Corewell Health Laboratories (West and South) will begin updating instrumentation for STI and HPV testing. Aptima collection devices will no longer be available except for pediatric patients under 14 years old.

To order the new swabs:

- Corewell Health and CHMG, please order via Workday ITM-1190747 as you run out of Aptima devices until the cutover date. (August 26th for West, late September for South)
- Independent Offices or other non-Corewell Health Sites, please use the Supply Form and continue to order STD multi-collection kit or ThinPrep Pap Container.

Please use for pediatric patients or discard any unused APTIMA kits. Please refer to the lab catalog or your lab services representative for more information on ordering and collection.

***Note: Pediatric patients 13 years and younger must be collected using the Aptima Collection Device, this is a sendout test to Quest Diagnostic Laboratory.**
