

May 2026

Dear Valued Client,

We are excited to share an update about the latest developments regarding Diagnostic Lab of Michigan, the joint venture between Quest Diagnostics and Corewell Health. Since finalizing our partnership in January, we have made significant progress with the operational integration. Construction of the new lab is also well underway.

Once construction is complete, our new state-of-the-art lab will open in early 2027. It will be located inside the Corewell Health Southfield Center Campus, 26901 Beaumont Blvd., Southfield.

Please note that until the new lab is operational, there are no changes to your current processes. You can continue to order lab services from Quest Diagnostics or Corewell Health as you do today.

As the newly appointed Vice President and General Manager of Diagnostic Lab of Michigan, I am honored to join and support the Michigan market. With 27 years at Quest Diagnostics, I have led laboratory operations, financial performance, and strategic partnerships across several successful joint ventures. I look forward to advancing innovation and enhancing the diagnostic services you rely on to provide the best care for your patients.

Barb Jacques, Senior Commercial Director, and Matt Boring, Sales Director, will continue to lead our growth and client satisfaction efforts. Supported by a dedicated sales team, they will remain your primary points of contact, providing updates on laboratory construction and new service offerings. Please do not hesitate to reach out to them with any questions.

Barb Jacques, Sr. Commercial Director

Phone: 248.568.4216

Matt Boring, Sales Director

Phone: 248.345.5604

Email: Matthew.Boring@corewellhealth.org

Through the combined strengths of Corewell Health and Quest Diagnostics, we are proud to serve our communities by:

- Employing more than 1,000 dedicated team members who work and live locally
- Offering convenient draw locations in most counties throughout the lower peninsula
- Supporting our clients with more than 300 highly skilled, professional in-office phlebotomists
- Making more than 80,000 stops a month for specimen pick-ups

We appreciate your continued trust and partnership as we expand access to advanced testing capabilities in Michigan.

Sincerely,

Dave M. Betz

Vice President & General Manager

Diagnostic Lab of Michigan
